

AFFORDABLE DESIGN & DATA SERVICES

We cater to small & medium sized businesses for web-site solutions. And we provide you the same consideration, service and commitment to deadlines as if we were your I.T. employee.

Since we provide services as an independent contractor we can concentrate on your web development needs & you don't have the administrative paperwork, insurance & hassle.

Our services do not require a fancy building or walk-in office - we always come to you. And since our overhead is low, we can keep our costs down and fit the budgets of small to medium sized business.

All of us involved with Web Consulting Services work independently from multiple locations. We communicate with each other as a team by teleconference, email, phone, texting or sometimes we get together for lunch.

WEB SITE DEVELOPMENT PRODUCTS AND SERVICES - solutions for small to medium sized businesses in Charlotte, Raleigh and the Triad

KNOWING THE INTERNET WE SEARCH NEW KNOWLEDGE AND TECHNOLOGY - Open source software development (OSSD) projects are growing at a rapid rate and thousands of projects have emerged within the past few years leading to the formation of globally dispersed virtual communities.

Examples of open software projects are found in social worlds surrounding computer game development, X-ray astronomy and deep space imaging, academic software design research, business software development; & Internet/Web infrastructure development.

Web Consulting Services is involved in various virtual communities and organizations.

Our developers concur over long distances in environments where people rarely meet face to face for the latest in software development processes. The culture of the free software development community ties contributors together with an esprit-de-corps. Popular literature has described open source developers as "geek", "nerdy" and technically savvy, but socially inept. Web Consulting Services would like to take issue that last misconception.

ALL THE ELEMENTS FOR SUCCESSFUL WEB CREATION & MAINTENANCE - Web Consulting Services provides all web design essentials to fully maintain your site, collect data, optimize the site, that all links work & provide services to complete your new business image typically sourced elsewhere. These extras are virtual attendants & phone service. We source new technology for cost reduction & profitability.
